Clique 2x para
abrir este
componente

```
4
5  //Importação do useState
6  import { useState } from 'react';
7
8  // Importação das telas
9  import Home from "../components/Home";
10 import Cadastro from "../components/Cadastro";
11
12 export default function App()
13 {
14   const Drawer = createDrawerNavigator();
15
```

The screenshot displays the Expo Snack web interface for a project named 'Aula204'. The editor shows the following code:

```

1 // Importação das bibliotecas
2 import { NavigationContainer } from '@react-navigation/native';
3 import { createDrawerNavigator } from '@react-navigation/drawer';
4
5 // Importação do useState
6 import { useState } from 'react';
7
8 // Importação das telas
9 import Home from '../components/Home';
10 import Cadastro from '../components/Cadastro';
11
12 export default function App()
13 {
14   const Drawer = createDrawerNavigator();
15
16   // este será o vetor principal
17   const [alunos, setAlunos] = useState([]);
18
19   return (
20     <NavigationContainer >
21       <Drawer.Navigator>
22         <Drawer.Screen name="Home" component={Home} />
23         <Drawer.Screen name="Cadastro" />
24         <Drawer.Screen name="Lista" />
25       </Drawer.Navigator>
26     </NavigationContainer>
27   );
28 }
29
30
31

```

The right sidebar shows the app preview with the title 'Home' and the main content:

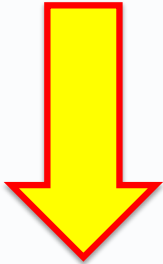

Sistema de Cadastro de Alunos

O objetivo deste aplicativo é desenvolver um app capaz de receber dados e armazenar em um vetor, e depois exibi-lo em uma FlatList

Desenvolvido pelo aluno Guilherme H. Souza

```
return (  
  <NavigationContainer >  
    <Drawer.Navigator>  
      <Drawer.Screen name="Home" component={Home} />  
      <Drawer.Screen name="Cadastro" />  
      <Drawer.Screen name="Lista" />  
    </Drawer.Navigator>  
  </NavigationContainer>  
);  
}
```

```
return (  
  <NavigationContainer >  
    <Drawer.Navigator>  
      <Drawer.Screen name="Home" component={Home} />  
      <Drawer.Screen name="Cadastro">  
        {() => <Cadastro alunos={alunos} setAlunos={setAlunos} />}  
      </Drawer.Screen>  
      <Drawer.Screen name="Lista" />  
    </Drawer.Navigator>  
  </NavigationContainer>  
)  
;
```

The screenshot shows the Expo Snack editor interface. The top bar indicates the project name 'Aula204 - Snack' and the URL 'snack.expo.dev/@guilhermehsouza16/aula204'. The left sidebar shows the project structure with files like App.js, Cadastro.js, and Home.js. The main editor displays the App.js file with the following code:

```

7
8 // Importação das telas
9 import Home from "../components/Home";
10 import Cadastro from "../components/Cadastro";
11
12 export default function App()
13 {
14   const Drawer = createDrawerNavigator();
15
16   // este será o vetor principal
17   const [alunos, setAlunos] = useState([]);
18
19   return (
20     <NavigationContainer >
21       <Drawer.Navigator>
22
23         <Drawer.Screen name="Home" component={Home} />
24
25         <Drawer.Screen name="Cadastro">
26           {() => <Cadastro alunos={alunos} setAlunos={setAlunos} />}
27         </Drawer.Screen>
28
29         <Drawer.Screen name="Lista" />
30
31       </Drawer.Navigator>
32     </NavigationContainer>
33   );
34 }
35
36
37

```

The right sidebar shows the web preview of the app. It has a title 'Home' and a main heading 'Sistema de Cadastro de Alunos'. The text below the heading reads: 'O objetivo deste aplicativo é desenvolver um app capaz de receber dados e armazenar em um vetor, e depois exibi-lo em uma FlatList'. At the bottom, it says 'Desenvolvido pelo aluno Guilherme H. Souza'.

The screenshot displays the Expo Snack web interface. The browser tab is titled 'Aula204 - Snack' and the URL is 'snack.expo.dev/@guilhermehsouza16/aula204'. The project name is 'Aula204' and it shows 'All changes saved 1 minute ago.' The left sidebar lists the project files: App.js, Cadastro.js, assets, components, AssetExample.js, Cadastro.js, estilos.js, Home.js, Lista.js, App.js, package.json, and README.md. The main editor shows the code for App.js, which imports Home and Cadastro components, uses createDrawerNavigator to create a Drawer, and returns a navigation container with three screens: Home, Cadastro, and Lista. The right sidebar shows the 'Cadastro' screen preview, which has a title 'Cadastro de Alunos' and three input fields labeled 'Digite o nome:', 'Digite o curso', and 'Digite a idade', followed by a 'Cadastrar' button. The bottom status bar indicates 'No errors', 'Prettier' formatting, 'Expo v54.0.0', '1 device', and 'Preview' mode.

```

7
8 // Importação das telas
9 import Home from "../components/Home";
10 import Cadastro from "../components/Cadastro";
11
12 export default function App()
13 {
14   const Drawer = createDrawerNavigator();
15
16   // este será o vetor principal
17   const [alunos, setAlunos] = useState([]);
18
19   return (
20     <NavigationContainer >
21       <Drawer.Navigator>
22         <Drawer.Screen name="Home" component={Home} />
23         <Drawer.Screen name="Cadastro">
24           {() => <Cadastro alunos={alunos} setAlunos={setAlunos} />}
25         </Drawer.Screen>
26         <Drawer.Screen name="Lista" />
27       </Drawer.Navigator>
28     </NavigationContainer>
29   );
30 }
